

B. Y. TRUST CONTROL HAS PASSED.

Colonel N. W. Clayton the New Owner.

C. E. TAYLOR NEW MANAGER

Mr. J. E. Dooley Denies the Report of His Connection With the New Deal and Mr. Menzies is Not in It.

The long talked of change in the ownership of the Brigham Young Trust company stock has been consummated, and for the first time in the history of the organization. The control of the company will be in the hands of one man. This party is Col. N. W. Clayton, who has long been a heavy owner and a member of the board of trustees managing the company. For some time past he has been buying the stock of his associates, and lately the blocks owned by George W. Thatcher, 397 shares, W. A. Rossiter, 170 shares, the State Bank of Utah, 1,000 shares, and Lawrence H. Young, 465 shares, passed into his hands, the price paid having been \$35 per share, which is somewhat higher than the quotations for several years past. The par value of the shares is \$100.

The ownership of these blocks, it is said, gives Col. Clayton and his brother Isaac A. Clayton, who is associated with him, a total of 2,900 shares, out of the 5,000 capital, or more than a control. It is said that the retiring trustees have tendered their resignations, and that their places will be filled at the forthcoming regular meeting of the trustees on October 14th. L. H. Young, manager of the company, will, however, retire on Oct. 1st, and will be succeeded by Mr. C. E. Taylor, the well known real estate dealer. Mr. Taylor being closely connected with J. E. Dooley, cashier of Wells Fargo's bank, and his brother-in-law, gave rise to the report that the control was associated with him, a total of 2,900 shares, out of the 5,000 capital, or more than a control. Col. Clayton is ill at his residence on Second street and could not be seen. The future plans of the Trust company,

therefore could not be ascertained, but parties close to him said that his belief that there was a great future in Salt Lake business realty, in which all the assets of the Brigham Young Trust company are invested. The company owns the Whitingham building on west First South, the big business structure on Commercial street, the brick row opposite the Theater, a long stretch of ground on State street, north of the Co-op Wagon & Machine company, the Nauvoo block and considerable Main street property. It is all rented to good advantage and is steadily increasing in value. Its only liability is said to be a blanket mortgage for \$250,000, held in the East, and the obligation of caring for the surviving widows of President Brigham Young, who under the terms of his will are to be furnished with a comfortable living out of the estate during the term of their lives. The amount of the compensation each receives is fixed by the board of trustees.

Among those of the old owners who have not parted with their interest are the estate of George Q. Cannon, Senator, and Bishop H. B. Clawson. Some of those who had sold their stock gave it as their opinion that the connection of Mr. Taylor with the company arose from the probability that while the stock was owned by Col. Clayton and his brother, Mr. Dooley was furnishing the funds for the transactions.

Greatest Celebration in the History of That City—Full Program.

Special Correspondence.

Nephi, Utah, Sept. 27.—The greatest celebration the town has ever witnessed came to a brilliant close last night. Sparks. Pilgrims' Chorus, Jubilee choir. Benediction, Apostle George Teasdale.

A most fitting close to our splendid jubilee was the presentation of the operetta, "The Rose of Auvergn," and the second act of "Martha" given by Messrs. Goddard and Pyper and Misses

Clark and Ferrin in the Tabernacle last night. Prof. McClellan, accompanist, before an audience which taxed the seating capacity of that building.

That the whole celebration was a grand success is the verdict of all, and that the sturdy pioneers in whose honor it was given feel that they have taken on a new lease of life, is evidenced by their smiling faces and hearty appreciation of all that was done for them.

PRICES STABLE, NOT INFLATED.

Normal Conditions Obtain Again in Business World.

BETTER GRADE OF GOODS.

Preference is for Them—Street Production Almost at Average Rate—Wheat Well Sustained.

New York, Sept. 27.—R. G. Dun & Co.'s weekly review of trade tomorrow will say: Normal conditions have been fully restored in the distribution of merchandise, the placing of delayed orders stimulating the few lines that appeared to halt. One of the most gratifying features of the business situation is the pronounced preference for the better grades of goods, clearly indicating the improved financial condition of consumers.

Resumption of work has progressed rapidly in the steel industry since the settlement of the labor controversy, and there is little discord between employer and employee in other lines. Stability of prices without inflation is the rule, except where unusual size of crops introduces a special factor. Steel production is now progressing at nearly the average rate. Higher prices are quoted for both steel and iron bars, steel billets and some other shapes. In pig iron there was the greatest activity since the strike began, most brands reaching higher prices. Sales of 35,000 tons Bessemer at valley furnaces were reported. Other large orders were under negotiation, and producers look for a rising market. A record-breaking output of steel rails is practically assured for 1901, and the new year will open with an unparalleled volume of business on the books. Plates and structural material are very strong.

The market for woolen wear is still on a strong basis. Leather and hides still reflect the heavy demand for finished products, and exports of leather are also a sustaining feature. Textile lines were well engaged as a rule. Wool is quiet, but firm.

Wheat is well sustained, and still better prices are promised by the heavy export movement, which, from all United States ports for the week reached 5,288,413 bushels of wheat and flour, against 3,557,482 bushels last year. Western receipts were 8,292,456 bushels, exceeding even liberal shipments in 1900 of 6,854,777 bushels.

Failures for the week numbered 227 in the United States, against 265 last year, and thirty-one in Canada, against eighteen last year.
